Printing date: 26.06.2013 Revision: 26.06.2013 Trade Name: POR-15 Rust Preventive Paint GRAY X Xi; Irritant R36/37/38: Irritating to eyes, respiratory system and skin. R10: Flammable. Information concerning particular hazards for human and environment: The product has to be labelled due to the calculation procedure of the "General Classification guideline for preparations of the EU" in the latest valid version. Classification system: The classification is according to the latest editions of the EU-lists, and extended by company and literature data. The classification is in accordance with the latest editions of international substances lists, and is supplemented by information from technical literature and by information provided by the company. 2.2 Label elements Labelling according to Regulation (EC) No 1272/2008 The product is classified and labelled according to the CLP regulation. Hazard pictograms GHS02 GHS07 GHS08 Signal word: Danger Hazard-determining components of labelling: Urethane prepolymer with MDI Solvent naphtha (petroleum), light arom. 4,4'-methylenediphenyl diisocyanate MDI based prepolymer **Hazard statements** H226: Flammable liquid and vapour. H332: Harmful if inhaled. H315: Causes skin irritation. H319: Causes serious eye irritation. H334: May cause allergy or asthma symptoms or breathing difficulties if inhaled. H317: May cause an allergic skin reaction. H340: May cause genetic defects. H350: May cause cancer. H335: May cause respiratory irritation. H373: May cause damage to organs through prolonged or repeated exposure. **Precautionary statements** P101: If medical advice is needed, have product container or label at hand. P102: Keep out of reach of children. P103: Read label before use. P210: Keep away from heat/sparks/open flames/hot surfaces. - No smoking. P260: Do not breathe dust/fume/gas/mist/vapours/spray. P285: In case of inadequate ventilation wear respiratory protection. P281: Use personal protective equipment as required. P233: Keep container tightly closed. P303+P361+P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P370+P378: In case of fire: Use foam, powder, or carbon dioxide for extinction. P342+P311: If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician. P403+P235: Store in a well-ventilated place. Keep cool.

# 4 First aid measures

#### 4.1 Description of first aid measures

#### General information:

Immediately remove any clothing soiled by the product.

Take affected persons out into the fresh air.

In case of irregular breathing or respiratory arrest provide artificial respiration.

#### After inhalation:

Supply fresh air; consult doctor in case of complaints.

In case of unconsciousness place patient stably in side position for transportation.

In case of irregular breathing or respiratory arrest provide artificial respiration.

#### After skin contact:

Immediately wash with water and soap and rinse thoroughly.

If skin irritation continues, consult a doctor.

#### After eye contact:

Immediately remove contact lenses if possible.

Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.

#### After swallowing:

Rinse out mouth and then drink plenty of water.

Do not induce vomiting; call for medical help immediately.

#### 4.2 Most important symptoms and effects, both acute and delayed

# Asthma attacks

Breathing difficulty

Printing date: 26.06.2013

Trade Name: POR-15 Rust Preventive Paint GRAY

Revision: 26.06.2013

#### Allergic reactions Nausea Cramp Coughing Disorientation Cvanosis Methaemoglobinaemia Hazards: Danger of pulmonary oedema. Danger of impaired breathing. Danger of convulsion. Danger of disturbed cardiac rhythm. Condition may deteriorate with alcohol consumption. 4.3 Indication of any immediate medical attention and special treatment needed Contains isocyanates. Consult literature for specific antidotes. If swallowed, gastric irrigation with added, activated carbon. In cases of irritation to the lungs, initial treatment with cortical steroid inhalants. If necessary oxygen respiration treatment. If swallowed or in case of vomiting, danger of entering the lungs. Treat skin and mucous membrane with antihistamine and corticoid preparations. Medical supervision for at least 48 hours. Later observation for pneumonia and pulmonary oedema. 5 Firefighting measures 5.1 Extinguishing media Suitable extinguishing agents: Alcohol resistant foam. Foam. Fire-extinguishing powder. Carbon dioxide. Gaseous extinguishing agents. Water haze or fog. For safety reasons unsuitable extinguishing agents: Water with full jet. Water spray. 5.2 Special hazards arising from the substance or mixture During heating or in case of fire poisonous gases are produced. 5.3 Advice for firefighters Protective equipment: Wear self-contained respiratory protective device. Wear fully protective suit. Additional information: Eliminate all ignition sources if safe to do so.

Cool endangered receptacles with water fog or haze.

Use large quantities of foam as it is partially destroyed by the product.

No further relevant information available.

# 6 Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

Use respiratory protective device against the effects of fumes/dust/aerosol. Wear protective equipment. Keep unprotected persons away.

Ensure adequate ventilation

Printing date: 26.06.2013

Revision: 26.06.2013

# Trade Name: POR-15 Rust Preventive Paint GRAY

Keep away from ignition sources.

Protect from heat.

6.2 Environmental precautions:

Do not allow to enter sewers/ surface or ground water.

6.3 Methods and material for containment and cleaning up:

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

Dispose contaminated material as waste according to item 13.

Do not flush with water or aqueous cleansing agents

#### 6.4 Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

# 7 Handling and storage

#### 7.1 Precautions for safe handling

Ensure good ventilation/exhaustion at the workplace.

Prevent formation of aerosols.

Avoid splashes or spray in enclosed areas.

#### Information about fire - and explosion protection:

Keep ignition sources away - Do not smoke.

Protect against electrostatic charges.

Keep respiratory protective device available.

Emergency cooling must be available in case of nearby fire.

# 7.2 Conditions for safe storage, including any incompatibilities Storage:

Requirements to be met by storerooms and receptacles:

Provide ventilation for receptacles.

Avoid storage near extreme heat, ignition sources or open flame.

Protect from humidity and water.

#### Information about storage in one common storage facility:

Store away from foodstuffs.

Store away from oxidizing agents.

Do not store together with acids.

Protect from humidity and water.

#### Further information about storage conditions:

Store in cool, dry conditions in well sealed receptacles.

Keep container tightly sealed.

Protect from humidity and water.

Store receptacle in a well ventilated area.

7.3 Specific end use(s): No further relevant information available.

# 8 Exposure controls/personal protection

# Additional information about design of technical facilities: No further data; see item 7. 8.1 Control parameters

8.2 Exposure controls

#### Personal protective equipment:

#### General protective and hygienic measures:

The usual precautionary measures are to be adhered to when handling chemicals.

Keep away from foodstuffs, beverages and feed.

Immediately remove all soiled and contaminated clothing.

Wash hands before breaks and at the end of work.

Do not inhale gases / fumes / aerosols.

Avoid contact with the eyes and skin.

#### Respiratory protection:

Combined Organic Vapor and Particulate Respirator are recommended for use during all processing activities.

#### Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. **Material of gloves** 

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the

Printing date: 26.06.2013

Revision: 26.06.2013

# Trade Name: POR-15 Rust Preventive Paint GRAY

resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.

# Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

# Eye protection:

Safety glasses

**Body protection:** Protective work clothing **Limitation and supervision of exposure into the environment** No further relevant information available. **Risk management measures** See Section 7 for additional information. No further relevant information available.

# 9 Physical and chemical properties

# **10 Stability and reactivity**

#### 10.1 Reactivity

10.2 Chemical stability:

Thermal decomposition / conditions to be avoided:

No decomposition if used and stored according to specifications

#### 10.3 Possibility of hazardous reactions

Flammable.

Can form explosive mixtures in air if heated above flash point and/or when sprayed or atomised.

Contact with acids releases toxic gases.

Danger of polymerization.

Reacts with amines.

Reacts with catalysts.

Can react violently with oxygen rich (oxidizing) material. Danger of Explosion.

#### 10.4 Conditions to avoid:

Keep ignition sources away - Do not smoke.

Store away from oxidizing agents.

10.5 Incompatible materials: No further relevant information available.

#### 10.6 Hazardous decomposition products:

Hydrogen cyanide (prussic acid) Nitrogen oxides

Isocyanate

Carbon monoxide and carbon dioxide

Danger of forming toxic pyrolysis products.

Printing date: 26.06.2013

Revision: 26.06.2013

# Trade Name: POR-15 Rust Preventive Paint GRAY

At long or repeated contact with skin it may cause dermatitis due to the degreasing effect of the solvent. Toxic and/or corrosive effects may be delayed up to 24 hours.

Danger through skin adsorption.

#### Repeated dose toxicity:

May cause damage to organs through prolonged or repeated exposure.

Repeated exposures may result in skin and/or respiratory sensitivity.

#### CMR effects (carcinogenity, mutagenicity and toxicity for reproduction):

Muta. 1B, Carc. 1B

# 12 Ecological information

#### 12.1 Toxicity

Aquatic toxicity: The product contains materials that are harmful to the environment.

**12.2 Persistence and degradability:** The product is partially biodegradable. Significant residuals remain.

**12.3 Bioaccumulative potential:** Does not accumulate in organisms.

**12.4 Mobility in soil:** No further relevant information available.

#### **Ecotoxical effects:**

Remark:

Due to mechanical actions of the product (e.g. agglutinations) damages may occur.

The product is oxygen-consuming. The declared action may be partly caused by lack of oxygen.

# Additional ecological information:

#### General notes:

This statement was deduced from the properties of the single components.

Avoid transfer into the environment.

Due to available data on eliminability/decomposition and bioaccumulation potential prolonged term damage of the environment cannot be excluded.

Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water

Do not allow product to reach ground water, water course or sewage system.

Danger to drinking water if even small quantities leak into the ground.

#### 12.5 Results of PBT and vPvB assessment

**PBT:** Not applicable.

vPvB: Not applicable.

**12.6 Other adverse effects:** No further relevant information available.

# 13 Disposal considerations

#### 13.1 Waste treatment methods

#### Recommendation

Must not be disposed together with household garbage. Do not allow product to reach sewage system. After prior treatment product has to be disposed of in an incinerator for hazardous waste adhering to the regulations pertaining to the disposal of particularly hazardous waste.

#### Uncleaned packaging:

Recommendation: Disposal must be made according to official regulations.

Recommended cleansing agents: Solvent naphtha.
