ADVANTAGES:

- Superb atomization with reduced paint overspray
- · Increased transfer efficiency means less wasted material
- · Light weight and ergonomic design make the guns easy to handle
- · Low air cap pressure helps reduce bounce back effect of material on surface being coated
- · Easy adjustments, cleaning and maintenance
- · Professional quality at affordable pricing
- Higher application rate and excellent leveling properties
- Touch up gun allows for refinishing in areas inaccessible with a standard size gun

SET UP & ADJUSTMENT

1. Starting

- a. Use the spanner wrench to tighten the fluid nozzle.
- b. Tighten the air cap and paint cup.
- c. Before connecting to gun, check air lines and fittings to ensure that they are clean and damage free.
- d. Soak gun thoroughly with cleaning solvent. Clean using approved cleaning materials according to local & federal regulations.

2. Fan adjustment

Use the fan adjustment control on the left side of the gun to obtain the desired pattern.

3. Air adjustment

Adjust the air pressure using the air adjustment knob at the bottom of the gun or the #6621 Air Regulator.

4. Fluid adjustment

Use the fluid control knob to obtain the desired fluid flow volume.

MAINTENANCE

To assure proper fit and performance, always change air cap, fluid nozzle and needle as a matched set. To change the needle packing, remove the fluid needle, fluid nozzle and the packing nut. A narrow, flat head screwdriver is required to remove the packing nut.

Cleaning and gun care:

- a. Immediately soak with solvent to remove all coatings after using.
- b. Clean the air cap with the brush provided.
- c. Lightly lube all moving parts with a non-petroleum based lubricant.

Note: Never use improper cleaning instruments as they may damage the part and adversely affect gun performance. Never immerse the gun in solvent.
